# 16 Good iPad Apps to Showcase Students Learning

## Interactive whiteboards and video creation apps

### Educreations

'Educreations is a unique interactive whiteboard and screencasting tool that's simple, powerful, and fun to use. Annotate, animate, and narrate nearly any type of content as you explain any concept.'

### Explain Everything

An interactive whiteboard that allows you to 'create slides using an infinite canvas, use a laser pointer, draw in any color, add shapes, text, math equations, videos, images and audio files, and record everything you do within the app'.

### Adobe Spark Video

Great for creating video stories. You can use images, add video clips, select your favourite soundtrack, add cinematic effects and design a beautiful video to share with others.

### iMovie

This is another powerful video making app. It provides you with all the features to create stunning videos documenting students learning.
## Apps for creating webpages, boards and docs

### Weebly

This is a simple and easy to use editor to create a website for your students.

### Adobe Spark Page

Adobe Spark Page allows you to create visual web stories using a wide variety of curated designs, text fonts, color and magazine styles.

### Padlet

Padlet is a digital canvas where students can showcase their work. They can include videos, text posts, upload documents and many more.

### Book Creator

This is an excellent app students can use to showcase their learning in different book formats. It can be a picture book, comics book, a journal.. etc.

## Apps for creating graphics, posters and photo collage
### Adobe Spark Post

Provides you with professionally designed templates to create graphics and visuals. The app is simple and easy to use, no design experience is required.

### PicCollage

PicCollage lets you create beautiful collage using photos imported from your photo library. It provides you with tools to work on your photos to rotate, resize, delete scraps, create doodle drawings, add frames and many more.

### Thinglink

With Thinglink you breathe life into your visuals. It lets you hyperlink and embed a wide variety of multimedia materials including videos, notes, music, and images.
### Piktochart

An excellent tool for designing posters, printables, presentations and infographics. It provides a wide variety of free templates that you can customize the way you want.

## Digital portfolio apps

### Seesaw

Seesaw is a student-centred digital portfolio that offers built-in creation tools including 'photo, video, recordable whiteboard, drawing, voice recorder, web link and PDF. Students use built-in audio recording, drawing and labeling tools to reflect or explain. Teachers can control who can see what, and whether students and families can add likes or comments.'

### Google Docs

This is an easy way for students to set up a page, populate it with their learning materials, and share it as a web link.

### Easy Portfolio

Easy Portfolio lets you create electronic portfolios where you can record and showcase learning materials in different forms including: audio recordings, music files, web links to online work, notes and text entries, digital documents from Dropbox or email and many more.

### Evernote

Evernote provides you with an easy and practical way to 'organize your personal and professional projects. Dive in: take notes, create to-do lists, and save things you find online into Evernote.'
